

LR3-IGF-1/ IGF1/ IBP1 (MG), Human, Recombinant

货号: PCK207

产品信息

别名	Insulin-Like Growth Factor I; IGF-I; Mechano Growth Factor; MGF; Somatomedin- C; IGF1; IBP1	
物种	Human	普诺赛。 Price
表达宿主	E.coli	

- 物种 Human
- 表达宿主 E.coli
- 序列信息 Gly49-Ala118
- 检索号 P05019
- 分子量 9.1 kDa

产品特性

纯度	>95% as determined by reducing SDS-PAGE.		
内毒素	<1.0 EU per µg as determined by LAL test.		
保存	Lyophilized protein should be stored at -5~-20°C, stable for one year after receipt. Reconstituted protein solution can be stored at 2-8°C for 2-7 days. Aliquots of reconstituted samples are stable at -5~-20°C for 3 months.		
运输	Ambient temperature or ice pack.		
制剂	Lyophilized from a 0.2 μ m filtered solution of 20mM NaAc-HAc, 4% Mannitol, pH 4.5.		

复融

Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is not recommended to reconstitute to a concentration less than $100 \mu g/ml$. Dissolve the lyophilized protein in 50mM Acetic Acid. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.

背景介绍

Insulin-Like Growth Factor I (IGF1) belongs to the family of Insulin-Like Growth Factors that are structurally homologous to proInsulin. Mature IGFs are generated by proteolytic processing of inactive precursor proteins, which contains the N- and C-terminal propeptide regions. Mature human IGF-I consisting of 70 amino acids has 94% identity with mouse IGF-I and exhibits cross-species activity. IGF-1 binds IGF-IR, IGF-IIR, and the Insulin receptor and plays a key role in cell cycle progression, cell proliferation and tumor progression. IGF-1 expression is regulated by growth hormone. R3 IGF-1 is an 83 amino acid analog of IGF-1 comprising the complete human IGF-1 sequence with the substitution of an Arg (R) for the Glu (E) at position three, hence R3, and a 13 amino acid extension peptide at the N terminus. R3 IGF-1 has been produced with the purpose of increasing biological activity. R3 IGF-1 is significantly more potent than human IGF-I in vitro.
